

CLASSES ARE FULL

Please check back in July for information
on the upcoming fall TCI Seminar.

The AI Seminar will be offered again in
the spring of 2025.

Canine Semen Preservation, AI and Breeding Management

Keys to a successful reproduction program

Hosted by Minitube USA in Verona, WI, USA

A course in a series of continuing education programs designed by Minitube USA to promote success in the field of reproductive science in canines. The two-day course features male andrology, canine collection, evaluation, chilling, freezing, breeding management and artificial insemination (AI) techniques.

The techniques taught at the seminars were developed at Minitube USA, the innovative leader in canine reproduction.

Course Schedule

Day 1

Morning Lectures

- Basic andrology
- Semen collection and evaluation
- Semen chilling

Afternoon Practical

- Semen Collection and Evaluation
- Chilling of semen
- Q&A

Day 2

Morning Lectures

- Breeding management
- Semen freezing
- AI techniques

Afternoon Practical

- Semen freezing
- AI techniques
- Q&A

Registration

Registration is limited to veterinarians and veterinarian technicians.

\$2,000 + tax

The Art of Transcervical Insemination in Canine

Hosted by Minitube USA in Verona, WI, USA

Since inception in 2006, this theoretical and practical seminar has been the benchmark for veterinarians to learn and refine the art of Transcervical Insemination (TCI). A personal teaching environment coupled with the latest endoscopic equipment make this an essential course for the development of the skills necessary to perform TCI in veterinary practice.

The techniques taught at the seminars were developed at Minitube USA, the innovative leader in canine reproduction.

Course Schedule

Morning

- Review of breeding management and AI timing
- Required equipment presentation
- Lecture and demonstration of TCI technique
- Equipment cost analysis
- Implementing TCI in the veterinary practice
- Insemination timing - single or multiple
- Use of sedation and potential complications
- Success rates and advantages/disadvantages of TCI

Afternoon

1. Assembly of equipment - Practical
2. TCI Procedure - Practical
3. Sterilization/care of instruments - Practical

Registration
