our knowledge, your success

Minitube: proven quality since 1970

Dear valued customers,

Minitube is totally committed to quality – this is at the core of everything that we do.

For our worldwide client base, we recognize that reliability, functionality and efficiency are key factors for running a stress-free and profitable production system. For over 50 years Minitube has delivered robust, high-performance, quality equipment and consumables to the assisted reproduction market.

As an industry leader, we accept the responsibility of providing products that do not compromise quality or safety. For this reason, all proprietary consumables and semen or embryo preservation media are manufactured in our own dedicated state-of-the-art facilities, supported by extensive in-house and external third-party QA testing you can trust. Minitube quality is not subjective but based on hard facts and decades of a successful track record.

Our total quality approach is underpinned by a long-term partnership strategy with our suppliers and customers. These long-standing relationships help build the trust and understanding required to ensure ongoing quality.

The same is true for our service team who are always striving to provide the best service within the industry. As a customer, the expert knowledge and know-how of Minitube staff is always available to you.

Moving forward we promise to continue researching and developing the best products and providing the best service, just as we have for more than 50 years.

Dr. Christian Simmet

1 SEMEN COLLECTION

Hannover artificial vagina

With valve, inner liner (100 cm), 3 rubber rings, and leather handle. Robust tubular rubber casing with rounded openings. Valve assembly allows air to be added for adjustment of inner pressure.

Hannover artificial vagina [1] 11220/0145

Accessories

Inner liner for Hannover AV, latex, roll-up ends, sterilizable [2]

long version, 100 cm 11222/0002

short version, 70 cm 11222/0003

Disposable inner liner for Hannover AV,

25/package 11245/0450

width 21 cm, roll with approx. 200 m; „sensitive“:
smooth and resistant material [3] 11222/0120

Rubber band for Hannover AV [4] 11222/0001

Leather handle for Hannover AV [5] 5011222/0008

Missouri artificial vagina

Double latex liner with valve and leather casing, adapter, and collection bottle. Valve assembly allows air to be added for adjustment of inner pressure.

Missouri artificial vagina [1] 11245/0000

Accessories

Double latex liner for Missouri AV, 70 cm 11245/00011

Disposable inner liner for Missouri AV, 25/package 11245/0450

Colorado artificial vagina

With 3 inner liners (tubular, conical, straight), 10 rubber bands, 2 clamps, 25 disposable inner liners, 25 semen bottles, 25 coupling nuts, 25 nylon filters, and warming bag. Robust tubular plastic casing with rounded openings. Valve assembly allows air to be added for adjustment of inner pressure.

Colorado artificial vagina [2] 11230/0000

Accessories

Inner liner for Colorado AV, latex, tapered end for connection to the bottle

straight form [3] 11231/0101

tubular, flared ends 11231/0103

Disposable inner liner for Colorado AV, 25/package [4] 11232/0110

AV shaped, 25/package [5] 11232/0102

width 31 cm, roll with approx. 200 m; „sensitive“: smooth and resistant material [6] 11232/0030

Warming bag for Colorado AV [7] 11231/0185

Accessories for all artificial vaginas

Semen collection bottle

200 ml, plastic, disposable, 100/package [8] 11231/0200

250 ml, glass 11245/0006

Warming bag for collection bottle, protects the semen from low temperature and UV radiation [9] 11225/0026

Coupling nut, for semen collection bottle, 100/package 11231/0301

Semen filter, nylon, fits semen collection bottle, 25/package [10] 11231/0400

Semen filter pouch,

non-woven, 150 x 60 mm, 100/bag [11] 11245/3100

non-woven, 125 x 90 mm, 10/bag 11260/1000

Thermometer for artificial vagina,

up to +100°C, bimetal, non-breakable [12] 11027/0000

up to +100°C, graduation 0.1°C, red filling [13] 11027/0100

HUMANS AND ANIMALS IN FOCUS

Designed to combine highest security with the best possible comfort for the stallion and the collection technician.

Stallion phantom Hannover

Product features

- Covered with reinforced synthetic coating for a very high level of hygiene: can easily be washed and effectively be disinfected
- Well-padded to ensure highest comfort even to heavily stimulated stallions
- Contoured body style makes it possible to hold and offer the AV at a most natural position
- Easy to install and very stable: two tubular legs fixed on the floor with four screws each ensure highest security for operators and stallions
- Size of the phantom fits for all breeds: body size 2 m x 60 cm x 55 cm (L x W x H) and shoulder height 1.30 m to 1.70 m

Stallion phantom Hannover, with removeable bite belt [1]

height and tilt angle adjustable to meet needs of different breeds and preferences **11200/0000**

with hydraulic height adjustment: both feet can be lifted or lowered about 40 cm either individually or together by means of a hand pump **11200/1000**

Accessories

Cover for phantom, synthetic material, collection side closed, with belts for attachment [2] **11200/2601**

Leather blanket for phantom, collection side closed, with belts for attachment [3] **11200/2501**

Bite belt [4] **11200/2100**

Stretch foil for protection of phantom, 300 m **32000/0010**

Warming cabinet

For drying, warming and sterilization of lab materials.

Product features

- Temperature range: +30°C to +300°C
- Natural ventilation
- Display with multi touchscreen
- Multifunctional PID microprocessor controller
- 1 Pt-100 sensor with double abnormal temperature protection (adjustable electronic temperature monitoring and mechanical temperature limiter)
- Adjustable addition of preheated fresh air

Warming cabinet

53 l, 400 x 400 x 330 mm, 55 kg, 230 V **14127/0053**

53 l, 400 x 400 x 330 mm, 55 kg, 115 V **14127/0054**

Many other warming cabinet sizes available!

Sterivar

Low pressure sterilizer, specially designed for artificial vaginas and accessories.

Product features

- Made of stainless steel, double wall with insulation
- With pressure safety valve, timer, water drain and protection against overheating
- Capacity: 15 artificial vaginas
- Temperature range: up to +100°C
- Pressure: max. 0.02 bar
- Inside dimensions: 750 x 400 mm
- Power supply: 115 V/60 Hz or 230 V/50 Hz
- Power consumption: 3500 W

Sterivar [1]	
230 V	11050/0015
115 V	11050/0014
Roller base for Sterivar [2]	
	11051/0000

Accessories for semen collection

Semen collection glove, blue, nitrile, extra sensitive, sperm safe, latex-free, powder-free, 100/box [1]	
size M	11128/0055
size L	11128/0060
size XL	11128/0065
Infrared thermometer, for temperature measurement without contact, with case and battery [2]	
15120/7000	
ReproJelly, non-spermicidal lubricant, water soluble	
tube with 100 ml, resealable [3]	11907/0100
3 l canister, without dispenser [4]	11907/3000
Dispenser for ReproJelly canister	11907/3100
Vaseline, 1 kg	11905/0100
Lubricating jelly Bengen, 1 l, water soluble	11906/1000

REPROJELLY LUBRICANT

Iso-osmotic and sperm friendly, supports the sperm cell viability. Ideal viscosity to better coat gloves, AI equipment and instruments.

2 SEMEN EVALUATION

AndroScope

AndroScope is a **compact mobile CASA system** that is based on AndroVision® and allows the operator to analyze semen motility and concentration of various species at any point in the production, transport, and insemination process.

AndroScope is equipped with a professional high-speed camera and a robust focus adjustment for precise semen analysis. The heating unit in the analysis area of the mobile CASA reaches +37°C within a few seconds, so that semen analysis is performed at optimal temperature conditions. AndroScope works with every PC, laptop, or tablet where MS Windows 10 or newer is installed (USB-3.0 plug is necessary to connect the device).

A practical, robust carry case provides optimal protection for the transport and contains everything you need to perform a semen analysis.

AndroScope [1] incl. transport case and accessories 12500/3000

Accessories

Disposable counting chamber Minitube, 20 µm, 4 chambers, 25/box 12050/0220

Test tube 2 ml with cap, 250/bag 14602/0904

Disposable capillary tube, 100/bag 15404/0100

Micro fiber rod, length 124 mm, 100/bag 12510/0106

Option: Mobile warming unit, for 6 reaction vials and 1 slide [2] 12057/6000

more information

AndroVision®

This highly precise, automated system for computerized semen analysis stands out for the integration of the classic CASA analysis with more advanced assays for sperm functionality. Concentration and motility as well as acrosome integrity, viability, mitochondrial activity, and DNA integrity can be assessed accurately and quickly with up to 1000 cells per field, making AndroVision® the perfect tool for the **objective and complete semen evaluation**.

The user interface is straightforward and easy to understand: **only three clicks from start to analysis result**. An optional touch screen interface and barcode scanner enhances the system for even quicker and more efficient application.

AndroVision® software	
with PC and monitor [1]	12500/0000
with PC, touch screen and barcode scanner	12500/0001
with laptop	12500/0010
AndroVision® high speed color camera [2]	12500/4400

Product features

- Real time analysis of live images and video files
- Analysis of up to 4 fields in 20 seconds
- Highly efficient particle filter for accurate sperm identification
- Analysis profiles for many species
- Adjustable analysis parameters and user created profiles
- Data export to MS Excel and other programs
- Languages: English, German, Spanish, Chinese, Portuguese, Russian, French

Accessories

Phase contrast microscope Zeiss Axiolab 5* [3]	12008/0020
ScanStage, automated microscope stage with integrated heating system [4]	12048/0031
Controller HTi 200 [5]	12057/0200
Warming plate, 245 x 200 mm [6]	12057/0510

Module Mitochondrial Activity*	12500/1700
Module DNA Integrity*	12500/1800

* Requires fluorescence microscope.

more information

Phase contrast microscope CX 43

Product features

- Phase achromat optics with universal condenser
- Heated microscope stage with temperature control unit HTi 200 and additional warming plate (180 x 180 mm)
- Integrated LED illumination
- Ergonomic design

Phase contrast microscope CX 43, with phototube (trinocular), objectives 20x, 40x **12005/0042**

Wide range of microscopes and accessories available!

Phase contrast microscope MBL

Functional microscope for semen analysis with heating system and control unit for freely adjustable temperature.

Phase contrast microscope MBL 2000

binocular, heated stage, HTi 50, objectives 10x, 40x, 100x **12010/3000**

binocular, heated stage, HTi 50, objectives 10x, 40x, 100x, with camera and monitor [1] **12010/3050**

Phase contrast microscope MBL 2100

trinocular, heated stage, HTi 50, objective 20x **12010/3103**

trinocular, heated stage, HTi 200, objective 20x, with camera and monitor **12010/3101**

Digital color camera for microscopes, with integrated image display software [2] **12110/1600**

Monitor 11.6" with HDMI input [3] **12110/1610**

Semen stains

Spermac, stain for morphology analysis, 4 x 50 ml [1] **15405/0000**

Farelly stain, for morphology analysis, 3 x 250 ml [2] **15405/0026**

Eosin G, 2% solution for supravital staining, 50 ml [3] **15405/0025**

Nigrosin, 4% solution for supravital staining, 50 ml [4] **15405/0029**

Laboratory scale

Precision scale for the determination of the ejaculate volume, weighing range max. 2000 g, resolution 0.1 g, weighing pan 130 x 130 mm.

Laboratory scale **14295/0444**

Glass ware

We offer a variety of measuring pipettes, graduated cylinders, beakers, dispensers, test tubes, Erlenmeyer flasks etc. Please contact us for further information!

Microscopy supplies

Microscope slide, 76 x 26 mm, 50/box [1]	15400/2400
Cover glass, 18 x 18 mm, 100/box [2]	15401/0990
Immersion oil, 8 ml [2]	12000/0101
Lens cleaning tissue, 90 x 72 mm, 500/package [4]	15230/9100

Counting chambers (hemocytometers)

Thoma new	15150/4771
Neubauer improved	15152/4421
Bürker	15153/0000

Pipettor

Adjustable single channel pipette, yellow, autoclavable, 10 - 100 µl	12425/4810
Pipette tip, 10 - 100 µl, yellow, 1000/bag	12425/9409

Photometer SDM 1

Product features

- Raw semen samples can be used without dilution
- Semen concentration is displayed in 10⁶ sperm/ml
- Electrical connection: with included mains adapter 100-240 V or batteries

Photometer SDM 1, calibrated for equine semen [1]	12300/0101
---	------------

Accessories

Microcuvette for SDM 1, 100/box [2]	12300/1111
Multispecies software, for reprogramming to other species	12300/0130

PROVEN ACCURACY

SDM 1 is a compact, highly precise photometer for measuring sperm concentration. Cleaning is simple, maintenance is minimal.

3 SEMEN DILUTION

■ Beyond®

The extender for long-term storage of chilled stallion semen.

⚙️ Product features

- Semen storage and transport for up to 14 days at +5°C
- The semen of so-called “poor coolers” – stallions that do not respond well to chilling and freezing or have low initial semen quality – can be stored for up to 7 days at +17°C
- Less collections and more flexible logistics of AI
- Longer storage time decreases the number of shipments of insemination doses
- Chemically defined, purely synthetic extender
- Ready-to-use in 100 ml bottles
- Lower risk of causing uterine inflammation
- Produced and quality controlled under GMP-certified guidelines
- Three easy steps for preparation: 1 to 1 dilution with pre-extender – centrifugation with or without CushionFluid – final dilution to 50-100 million sperm cells/ml with Beyond®

Beyond®, 100 ml ready-to-use extender

13570/0100

GAME-CHANGER FOR THE HORSE BREEDING INDUSTRY

With Beyond®, storage of stallion semen is finally possible for up to 14 days at +5°C.

more
information

EquiPlus

Balanced medium based on skim milk for preservation of sperm activity up to 72 hours. Designed for +5°C storage and transport.

Extender preparation

CushionFluid, for gentle centrifugation of stallion spermatozoa, assures a higher yield of sperm cells as compared to standard centrifugation	
100 ml [1]	13580/0001
30 ml	13580/0030
Centrifugation medium, powder for 1 l transparent EDTA-Glucose solution [2]	13565/0001
Double distilled water, sterilized, pyrogen-free	
1 l [3]	13570/1000
100 ml	13570/1100

PERFECT COMBINATION

The combination of extender powder (contained in the lid) and sterile, pure water (in the bottle) ensures that EquiPlus Combi is extremely easy to prepare.

Semen dilution

Spectrum - The SBS CryoSystem

The SBS CryoSystem consists of a range of Spectrum freezing extenders, which feature different cryoprotectants and specific different egg yolk or milk content. The Spectrum concept allows to identify the best freezing extender for each individual stallion. It is possible to achieve pregnancy rates with frozen-thawed semen which are comparable to cooled semen.

Five ready-to-use solutions are available, designed for transport and storage at -20°C.

Spectrum Orange	
30 ml	13572/0020
15 ml	13572/0200
Spectrum Red	
30 ml	13572/0030
15 ml	13572/0300
Spectrum Green	
30 ml	13572/0040
15 ml	13572/0400
Spectrum Blue	
30 ml	13572/0050
15 ml	13572/0500
Spectrum Violet	
30 ml	13572/0060
15 ml	13572/0600

more information

Low in milk and egg yolk
Best combined with slow cooling and freezing

High egg yolk content, no milk
Best combined with rapid cooling and freezing

Milk-based, low in egg yolk
Best combined with rapid cooling and freezing
Beneficial for certain stallions only

Low in milk and egg yolk
Best combined with slow cooling and freezing
Cryoprotectant is highly membrane permeable

Low in milk, contains egg yolk
Best combined with slow cooling and freezing
Balanced combination of cryoprotectants

Spectrum Duo

Spectrum Duo is a new presentation of the SBS Spectrum extenders, designed for easier logistics. Providing the same results as the ready-to-use options, the Spectrum Duo extenders consist of two components that can be easily blended into the finished product by adding egg yolk. Transport at <+20°C, storage at <+8°C.

Spectrum Duo Red	13572/0230
Spectrum Duo Violet	13572/0260

Spectrum test freeze kit

The kit contains: 2x Spectrum Orange (15 ml), 2x Spectrum Red (15 ml), 1x Spectrum Blue (15 ml), 1x Spectrum Violet (15 ml), 1x Spectrum Green (15 ml), 2x CushionFluid (30 ml), 2x SBS Centrifugation Medium (120 ml).

Spectrum test freeze kit	13572/0000

Many other
water
bath sizes
available!

Water bath

- Electronic temperature control, stainless steel, with grid and lid
- Working temperature range: minimum 5°C above ambient up to +100°C (depending on ambient pressure)
- Intuitive 3.5" color graphic display with touch screen
- Inner dimensions: 267 x 200 x 207 mm (L x H x D)
- Outer dimensions: 349 x 378 x 289 mm (L x H x D)

Water bath, 10 l

230 V	14079/0001
110 V	14079/0002

Centrifuge Minitube

- With swing out rotor
- Complete with buckets for vials: 4 x 100 ml/4 x 50 ml/8 x 15 ml
- Speed in g (RCF) and rpm: max. speed 4000 rpm/2200 x g
- Memory: 100 programs
- Dimensions: 350 x 480 x 340 mm (W x H x D)

Centrifuge Minitube

230 V	14601/0000
110 V	14601/0001

Rotating mixer RM5

- For gentle, constant homogenization of semen doses in tubes
- Appropriate for use inside the refrigerator
- With 5 rollers; roll length: approx. 320 mm
- Dimensions: 430 x 110 x 180 mm (W x H x D)

Rotating mixer RM5

230 V	14340/0348
110 V	14340/0349

Shaking device VIBRAMAX 100

- Platform with two fixation devices and non-slip rubber pad, includes timer
- Shaking rate: continuous electronic regulation (150 -1350 rpm)
- Shaking amplitude: 3 mm
- Timer: 0-120 min, pre-selectable, continuous operation possible
- Area of platform: 220 x 220 mm

Shaker

IMPROVE YOUR CO₂ FOOTPRINT

The Jute transport box is a sustainable, space-saving, and functional packaging solution. The inlays are 100% compostable.

Jute transport box

Product features

- Made of Jute, a naturally renewable raw material
- Holds constant temperature for up to 30 hours
- Includes cardboard box, Jute inlays, 2 cool packs and 2 plastic tubes (50 ml)
- Outer dimensions: 200 x 185 x 200 mm (W x D x H)

Jute transport box

17229/0001

Neopor transport box

Product features

- Made of highly insulating Neopor
- Holds constant temperature for up to 45 hours
- Includes transport container, cardboard box, 2 cool packs, 2 disposable syringes (20 ml), 2 protecting caps for syringe, 2 plastic tubes (13 ml)
- Outer dimensions: 290 x 290 x 180 mm (W x D x H)

Neopor transport box

17229/0002

5 SEMEN STRAW PROCESSING

SFS 133

Product features

- Semiautomatic filling and sealing machine
- Straws are filled and sealed 6 by 6
- Sealing is done securely and hygienically with metal sealing balls
- An air bubble of 1 cm is automatically produced in each straw
- Capacity: approx. 2000 straws/hour

SFS 133, for 0.5 ml straws, with vacuum bottle, filling and suction head, straw magazine **13133/0133**

Low density vacuum pump, 30–60 Hg, with manometer and valve
230 V/50 Hz **13133/0267**
115 V/50 Hz **13133/0268**

Cartridge loading device, with loading block and 10 cartridges for 36 straws 0.5 ml **13133/0005**

Accessories

Filling head with 6 nozzles **13133/1000**

Suction head with 6 nozzles **13133/2000**

Washer, for all filling and suction nozzles, 5000/bag **13021/3001**

Silicone tubing for SFS, transparent, 3 x 1 mm, length 10 m **13133/3550**

Metal sealing ball for 0.5 ml straws **13400/9900**

MPP Uno

Seals and fills 1 straw per cycle – ideal for handling small volumes.

Product features

- Automatic filling and sealing machine for 0.25 and 0.5 ml straws
- Capacity: approx. 4000 straws/hour
- Fast, tool-free conversion between 0.25 and 0.5 ml straws and vice versa (1-2 minutes)
- Exchangeable hopper, capacity: 2400 MiniStraws (0.25 ml) or 1200 medium straws (0.5 ml)
- Ultrasonic sealing unit, ultrasonic generator in an external casing that can be installed at up to 2.5 m (ON/OFF switch directly on the machine)
- Designed to provide ideal conditions for hygiene and safety
- Can be operated in cold room or cabinet or at room temperature as stand-alone or combined with MiniJet printer (CombiSystem)
- Very compact device which takes up little space; machine dimensions: 460 x 350 x 410 mm (W x H x D) plus ultrasonic generator
- Vacuum unit with integrated reservoir and automatic readjustment function; vacuum level can be easily modified via buttons
- PLC microprocessor control
- Power supply: 110 V/60 Hz or 230 V/50-60 Hz

MPP Uno, complete [1]

Semen straw processing

EasyCoder

Clean and odorless printing of straws without ink and solvent.

Product features

- Thermal transfer printer with automatic straw supply (output: up to 3600 straws per hour) for immediately abrasion-resistant print
- Unparalleled precise and clear printing on 0.5 and 0.25 ml straws; easy and quick conversion between different straw sizes
- Prints up to 3 lines per straw, including barcodes, logos, and special characters
- Control via PC by a clear and user-friendly Minitube software
- Easy handling, little maintenance required
- Dimensions (L x W x H): 660 x 370 x 310 mm (PC not included)
- Power supply: 110 V/50-60 Hz or 230 V/50-60 Hz

EasyCoder printer [13038/0000](#)

information

MultiCoder

Quick and easy machine-readable labeling of lab items.

Product features

- High resolution inkjet printing
- Print head protection system (avoids drying out of ink)
- Wide variety of product carriers
- No tools needed for change of product carriers
- Pre-designed print layouts
- Loads excel files for printing
- Easy drag & drop editing of print layouts

+ Your benefits

- + Very versatile: print system can label most kinds of materials such as plastics, glass, or aluminum
- + Manually moveable slide and a unique, easy-to-use carrier system allow for a speedy work process
- + Easy printing of information on the smallest amount of space, including text, barcode, QR-Code, and logo

MultiCoder printer [13145/0000](#)

UNIQUE, FLEXIBLE & VERSATILE

Quick and easy print on a whole range of items: semen straws, goblets, cassettes, culture dishes, Macrotubes, syringes, cryovials and many more.

information

Semen straws

For over 30 years, Minitube straws have been used worldwide as a standard for the freezing of semen. Minitube's quality control process, production techniques, and material selection ensure for a **reliable product** that consistently exceeds industry standards.

EcoStraws feature a wick with a shorter inner wick section that **absorbs 3 to 4% fewer sperm** than the corresponding symmetrical wick of standard semen straws. They are ideal for overnight equilibration of semen at refrigerated temperatures. EcoStraws are used in exactly the same way as standard semen straws.

Semen straws are available pre-printed upon request.

6 SEMEN FREEZING AND CRYOSTORAGE

Freezing units

Minitube freezing units are compact and easy to handle. They are made of a high-quality Styrofoam box, an inner container of stainless steel and a floating rack. The stainless steel container is filled with liquid nitrogen. The rack keeps the needed distance between 0.5 ml or 0.25 ml straws during the first down phase, while it floats on liquid nitrogen. After that, the straws get manually immersed into the nitrogen.

Product features

- Distance between straws and liquid nitrogen level can be adjusted
- Fits 0.5 ml and 0.25 ml straws
- Low nitrogen consumption
- High quality Styrofoam chest and stainless steel inner box
- Easy transport

Automatic freezer IceCube 14S

Computer controlled freezer, with comfortable data input and automatic recording of the freezing curve.

Product features

- Temperature range: +40 to -180°C
- Freezing rates: 0.01 to 60°C/min
- Heating rates: 0.01 to 15°C/min
- Display accuracy: 0.01°C
- Temperature measurement via 2 Pt-100 resistance thermometers
- Capacity: approx. 900 x 0.5 ml straws per freezing cycle
- Software for freeze programming and control: unlimited storage of programs and processed files, color graphic display of all temperature curves, wide possibility of parameter settings
- Dimensions: 540 x 420 x 520 mm (L x W x H), weight: 29 kg

Semen freezing and cryostorage

7 INSEMINATION AND DIAGNOSTICS

Universal insemination pipette

Product features

- Suitable for liquid and frozen-thawed semen in straws
- Smooth round tip for gentle introduction
- Flexible shaft facilitates handling; long pipettes with ultra flexible shaft for deep intrauterine insemination
- Precision tooled tip with inner cone for 0.5 ml straws to allow direct position of semen into the uterus and to ensure 100% semen delivery
- If used with the AI stylet for 0.5 ml straws, the same pipette can be reloaded with consecutive straws in situ
- Finger handle with adapter to fit syringe and Macrotube straw

Universal pipette

length: 57 cm, 5/bag	17209/0005
length: 57 cm, 1/bag, sterilized	17209/0001
length: 65 cm, 5/bag	17209/1165
length: 65 cm, 1/bag, sterilized	17209/1265
length: 75 cm, 5/bag	17209/1175
length: 75 cm, 1/bag, sterilized	17209/1275

Deep intrauterine insemination pipette

For deep intrauterine insemination (IUI) with small volumes of liquid semen if straws cannot be used. The pipette is equipped with an inner catheter to reduce the volume of the channel where the semen must pass through.

IUI pipette with inner catheter	
length: 65 cm, 5/bag	17207/1165
length: 65 cm, 1/bag, sterilized	17207/1265
length: 75 cm, 5/bag	17207/1175
length: 75 cm, 1/bag, sterilized	17207/1275

Flexible stylet

Flexible stylet for deep intrauterine or transcervical insemination of mares with universal pipette and 0.5 ml straws. Semen in 0.5 ml straws is directly placed into the uterus, ensuring 100% semen delivery. The stylet is made of stainless steel and is provided with 2 knobs to pull out empty straws, thus the same pipette can be reloaded several times.

Flexible stylet	
length: 57 cm	17209/1057
length: 65 cm	17209/1065
length: 75 cm	17209/1075

MiniThaw thawing unit

Product features

- Variable temperature setting (ambient to +50°C)
- Digital display of current temperature
- Straw lift has three compartments and allows thawing of up to 10 straws at a time (0.5 ml or 0.25 ml)
- Can be used in the car (12 V/24 V) or plugged into the wall socket (110/230 V)
- Robust and easy to handle

MiniThaw [1] 17048/0000

Accessories

Transformer for thawing unit 12 V/110 V/220 V 17165/1395

Base for MiniThaw, metal [2] 17048/0005

Digital timer, magnetic, battery included [3] 17048/0006

MiniCutter

Product features

- Precise cutting of 0.25 and 0.5 ml straws
- Facilitates straight cut at exactly the right length, which helps to avoid semen loss
- Ergonomic shape
- Easy to keep clean

MiniCutter for straws 17062/0010

Insemination gloves

Recyclable polyethylene gloves that are both flexible and strong, giving you excellent feel combined with good protection. The reduced diameter of the glove will help to keep it on your arm without compromising its robustness.

Insemination gloves, 5 finger, shoulder length

sensitive, green, 100/box [1] 17080/0015

super-sensitive, transparent, 100/box 17080/0050

super-sensitive, transparent, single packed, sterilized, 50/box 17080/0052

green, single packed, sterilized, 50/bag [2] 17080/0250

Uterus culture swab

Introduction pipette with pre-perforated cap for sampling without risk of contamination. Predetermined breaking point of the sample-protecting sheath. Includes two closing caps for transport of the swab to the lab. Swab may be inserted directly into AMIES transport medium to avoid dehydration of the sample.

Uterus culture swab , individually packed, sterilized, 10/bag	
with AMIES transport medium	17214/2951
without transport medium	17214/2950

Cytology brush

For picking up cells of the uterus of mares to perform cytology smears for immediate evaluation.

Cytology brush , individually packed, sterilized, 10/bag, with transport box for slides	17214/2960
--	------------

Colostrum refractometer

Determines the amount of immunoglobulin in the mare colostrum to ensure sufficient supply for the newborn foal. Colostrum of good quality should be frozen for emergency use. Only one drop of colostrum is required for testing. No batteries, no consumables, easy handling.

Colostrum refractometer	24400/0150
--------------------------------	------------

Specula and forceps

Disposable speculum , made of cardboard with reflecting aluminum coating, smooth front edge for gentle introduction, inner diameter: 3 cm, length: 43 cm, sterilized, 100/box [1]	17210/0000
--	------------

Polansky speculum , stainless steel [2]	17210/4200

--	------------

Accessories

Metal case , with lid and handles for sterilization and transport of speculum and cervical forceps, 560 x 230 x 120 mm (W x H x D) [5]	17215/0149
---	------------

LED-light , battery operated (up to 250 h), with clip for fixing, length: 96 mm [6]	17210/0010
--	------------

8 EMBRYO TRANSFER AND OPU

Embryo flushing catheters for mares

All sizes allow high-flow of flushing media in combination with high-flow Y-junction. The balloon (100 ml), when inflated, facilitates tight closure of the cervix.

Product features

- Single packed, sterilized
- Length: approx. 90 cm
- Foley end, large front ports
- CH 28: closed end, CH 32 and CH 36: open end
- Made of silicone, sterilizable

Embryo flushing catheter

CH 28	19009/0028
CH 32	19009/0032
CH 36	19009/0036

Flushing catheter extension, high flow, length: 60 cm, spike port 19009/0041

EASY AND SAFE TO USE

All-in-one dual-purpose filters and search dishes that require no attention during flushing procedure. Embryos are recovered directly from the filter dish.

Filters for embryo collection

Product features

- Secure fixation of the lid during collection and easy to open after collection (no screw cap)
- Integrated search dish engraved with a grid makes it easy to search and find embryos (ideal mesh size for all embryo sizes)
- Also suitable for filtering oocytes after OPU
- Filter mesh cannot dry out as it remains in contact with fluid
- Excess fluid is controlled and removed through outlet tubing with attached thumb clamp (entry hole is big enough to ensure the necessary flow speed of the flushing medium)
- Connection to all types of Y-tubing is possible
- Sterilized and absolutely tight

EmSafe

Product features

- Maintains a constant 60 ml of flushing fluid in the dish
- Air vent in the lid and air outlet are provided with a filter which is holding embryos securely in the system

EmSafe filter

19010/6000

Miniflush®

Product features

- Vertical recovery system with large filter surface area
- Maintains a constant 20 ml volume during the entire flushing procedure
- Due to its shallow design, search dish is perfectly suited for use with all microscopes

Miniflush® filter

19222/2000

Flushing tubing

Disposable Y-junction tubing with clamps, to be used in combination with any catheter. Tubing made of very smooth, flexible material. End for filter connection requires no extra adapter. Sterilized, 1/bag.

Y-junction tubing, large lumen, spike port

19982/0202

EquiFlush

Ready-to-use medium for equine embryo recovery. Complete formulation containing buffers, BSA or PVA and antibiotics.

- Available in plastic bottles and infusion bags
- Bottles with tab on the bottom to hang them up and rubber stopper for easy connection of the Y-tubing
- Infusion bags with 3-way port configuration and sealed ports for hygienic fluid removal
- Graduation in steps of 100 ml simplifies dosage and allows monitoring the volume during flushing

Recovery medium

EquiFlush	
with BSA and antibiotics, 1 l, bag	19982/6201
with BSA and antibiotics, 2 l, bag	19982/6202

with PVA and antibiotics, 1 l, bottle	19982/6213

EquiHold

Ready-to-use holding medium for equine embryos. Contains buffers, glucose, pyruvate, BSA, amino acids, growth factors and antibiotics. Applicable for:

- Holding embryos at ambient conditions
- Transporting embryos
- Washing and rinsing embryos
- Loading embryos for transfer to recipient animal

Holding medium

EquiHold, 3 x 5 ml	19982/6250
--------------------	------------

Equine VIT-Kit

Vitrification kit for direct transfer vitrification of equine embryos. The kit contains everything needed for the vitrification of 3 embryos:

- Equilibration medium (3 x VS1, 3 x VS2, 3 x VS3)
- 3 x diluent
- 1 x syringe 1 ml for loading straws
- 1 x pipette tip (straw adapter)
- 4 x 5-well culture dish
- 10 x 0.25 ml sterilized straws for vitrification
- 10 x 0.5 ml sterilized straws for transfer
- 3 x ID rod
- 1 x aluminum cane
- 3 x goblet 10 mm

Equine VIT-Kit	19982/6251
----------------	------------

Stereo-zoom microscope

Product features

- Mirror with LED illumination for improved visualization of zona pellucida
- Total magnification from 10x to 70x
- 2 eyepieces 10x
- 110 V/60 Hz or 230 V/50 Hz

Stereo-zoom microscope

binocular	12014/0000
trinocular	12014/1000

CryoSealer

Manual sealer using ultrasound technology. Can be used for 0.25 and 0.5 ml straws. Ultrasound welding facilitates a perfect and uniform seal of each straw. Power supply: 100-240 V AC/50-60 Hz.

CryoSealer	13135/0000
------------	------------

Manual sealer

Manual sealer for straws, securely seals all kinds of straws by applying heat at the end of the straws (also in liquid nitrogen vapor). Consists of a plier welding head adapted for straws and a control unit for varying heat level.

Manual sealer	13135/2500
---------------	------------

Manual ball sealer

0.5 ml straws are individually sealed with the balls.

Manual ball sealer	13136/0100
--------------------	------------

EquiPlus OPU recovery medium

Complete solution, ready-to-use, containing BSA and Heparin to avoid blood coagulation during the OPU procedure.

EquiPlus OPU recovery medium, 500 ml	
with PVA	19982/2283
with BSA	19982/2281

Ultrasound device GE Versana Active

Product features

- Portable, easy-to-use ultrasound system for linear and convex sector probes
- High quality documentation and data transfer system
- Display modes: B-Mode, M-Mode
- PW Color Doppler with automatic calculation
- Realtime Triplex-Mode
- Coded Harmonic Imaging, CrossXBeam, Speckle Reduction Imaging (SRI-HD) for exceptional image quality
- Connectivity: USB, HDMI, Ethernet
- Monitor: 15.6" high-resolution LCD
- Dimensions: 39 x 5.8 x 36.2 cm (W x H x D)
- Weight: 5 kg with battery
- Electrical connection: 100-240 VAC/50-60 Hz

Ultrasound device GE Versana Active	23360/0000
-------------------------------------	------------

Accessories

Convex sector probe, 6.0 - 10.0 MHz	23360/0002
Endorectal linear probe, 3.5 - 10.0 MHz	23360/0003

■ Ultrasound probe holder

⚙️ Product features

- Has a needle guide included and is used with the double lumen needle: the two spaces allow simultaneous or alternating aspiration and injection of fluids into and from the follicles
- OPU needle is connected to the aspiration and flushing pump for equine OPU, Ref. 23362/0002 (230 V) or 23362/0003 (115 V)

Ultrasound probe holder [1]

for GE probe	19009/3100
for Esaote probe	19009/3101
for Sonosite probe	19009/3102
for BCF/Mindray probe	19009/3103

⚙️ Accessories

Double lumen needle, 12 G, 25", consists of outer needle and inner cannula [2]	19009/3105
Replacement needle, 12 G, 25"	19009/3106
Cover for probe holder, 144/package	23360/1260

■ Aspiration and flushing pump for OPU

OPU pump for follicle aspiration and flushing, oocyte collection in mares with durable casing.

⚙️ Product features

- Two pumps and a warming block are combined into one unit for convenient oocyte aspiration
- Pressure levels and hysteresis are programmable by the user
- The pump is operated by foot switches

Aspiration and flushing pump for OPU [1]

220-240 V/50-60 Hz	23362/0002
110-115 V/50-60 Hz	23362/0003

⚙️ Accessories

Stopper assembly, snugly connects to 50 ml tubes, 1/package [2]	23360/1100
Disposable tubing, for transvaginal oocyte aspiration in mares [3]	19009/4101

Upon request we offer the device also adapted to other probes.

Embryo transfer and OPU/IVP

9 TRAINING AND SERVICE

Training and education

Minitube offers specialized product training and educational seminars in assisted reproduction technologies worldwide. Individual and open seminars providing instructions in artificial insemination, embryo transfer, semen analysis, semen processing and more are offered according to demand.

All training courses blend theoretical knowledge and practical experience. Our instructors are well-respected experts in assisted animal reproduction. Minitube cooperates closely with leading studs, universities, and research centers. The collective experience and knowledge are incorporated into our seminars where the latest technologies and practices are demonstrated and trained with the participants.

The courses are interactive workshops where presentations, discussions, demonstrations, and practical exercise go hand in hand. Minitube training sessions offer useful troubleshooting tips, and the trainees benefit from the “learning by doing” approach. Participants receive valuable documentation and a certificate of participation. Minitube trainings are very flexible and available at Minitube premises, at partner facilities, at the customer site and virtually.

We are happy to find the best training option for you.
Please contact us: seminar@minitube.de

Mobile lab service

Minitube Middle East offers unique professional lab service to customers particularly in remote areas. The Mobile Lab is a van equipped with high-quality Minitube equipment to analyze and preserve/freeze animal semen or embryos.

Minitube Middle East offers the service to customers in the United Arab Emirates, Saudi Arabia, and Oman, in regions which otherwise have no access to a professional laboratory for semen and embryo preservation.

Please contact us for further information about the service and if you would like to discuss how to construct your own mobile laboratory: minitube@minitube.de
